

Weekly Legislative Update: **Gun Safety**

Issue Team Coordinator: [Cynthia Stewart](#)

Advocate: [Pat Griffith](#)

April 2, 2023

There are no actions needed this week as we await the next steps for bills that move on to the Rules Committee or from there to the floor for action.

Bills that Passed the House of Origin

[HB 1143](#) Concerning requirements for the purchase or transfer of firearms, would require an approved safety training course within five years, fingerprinting, and background check in addition to a 10-day waiting period before a dealer can hand over a firearm. The purchaser would need to complete a background check, show that an approved safety training course has been completed. A waiting period of 10 days from the application date would be required before the dealer would hand over the firearm. These requirements are similar to those for a concealed weapons permit. Fourteen states have similar requirements and have found that they have reduced fatalities by 14%. The requirements could also interrupt suicide attempts, which are often impulsive decisions. Suicides constitute 75% of gun deaths in Washington. Opponents say the requirements violate Second Amendment protections. **HB 1143** passed the House with a vote of 52 to 44. It passed the Senate Law & Justice Committee with amendments on March 28 and is now in the Senate Rules Committee.

[HB 1240](#) Establishing firearms-related safety measures to increase public safety, would essentially ban the manufacture, distribution, and purchase of assault-type weapons which have been used in most mass shootings. The weapons specified in the bill are variations of military weapons designed to kill as many persons as possible in the shortest time period. Washington would become the tenth state to ban assault weapons if the bill passes. This is the sixth year a ban on assault weapons has been proposed by the Attorney General. This bill was passed as a substitute from the House Civil Rights & Judiciary Committee and is now in the House Rules Committee. The amendment allows a Tacoma manufacturer to continue manufacture of accessories to be sold out of state. This bill passed the House with a vote of 55 to 42. It had passed the Senate Law & Justice Committee with amendments on March 28 and is now in the Senate Rules Committee.

[HB 1562](#) Reducing the risks of lethality and other harm associated with gun violence, gender-based violence, and other types of violence. This bill concerns procedures regarding restoration of right to purchase firearms after period of revocation. It passed the House with a

vote of 51-46. It passed the Senate Law & Justice Committee with amendments on March 22 and was referred to the Senate Ways & Means Committee, where it had a public hearing on March 30 and is scheduled for executive session on April 3.

HB 1600 Providing access to sealed juvenile records for firearm purposes would allow any law enforcement agency access to sealed juvenile records but only for background check purposes regarding prior convictions and mental health checks before a person could purchase or transfer a firearm. This bill passed the House on February 27 with a vote of 95-0 and had a public hearing in the Senate Law & Justice Committee on March 13. On March 22, the bill was passed out of committee as a substitute and referred to the Senate Rules Committee.

SB 5078 Protecting public safety by establishing duties of firearm industry members. It would allow individuals to sue gun manufacturers to sue for harm caused by a firearm and authorizes the Attorney General to declare a product a public nuisance. This bill passed the Senate as a substitute on March 2 with a vote of 28 to 21. It passed the House Civil Rights & Judiciary Committee as a substitute on March 24 and was referred to the House Appropriations Committee. It had a public hearing on March 30 and executive session on March 31.

Bills That Died

HB 1144/SB 5232 Enhancing requirements for the purchase or transfer of firearms, would require background checks go through the Washington State Patrol rather than local law enforcement agencies. **HB 1144** had a public hearing but there was no action taken at the subsequent executive session. **SB 5232** passed the Senate Law & Justice Committee and was referred to the Senate Ways & Means Committee but never had a public hearing in that committee.

SB 5211 Concerning requirements for the purchase or transfer of firearms, a companion bill to HB 1143, above, would require an approved safety training course within five years, fingerprinting, and background check in addition to a 10-day waiting period before a dealer can hand over a firearm. These requirements are similar to those for a concealed weapons permit. Fourteen states have similar requirements and have found that they have reduced fatalities by 14%. The requirements could also interrupt suicide attempts, which are often impulsive decisions. Suicides constitute 75% of gun deaths in Washington. Opponents say the requirements violate Second Amendment protections. This bill never had a public hearing and therefore did not pass out of the policy committee by the cutoff date.

HB 1178/SB 5446 Concerning local government authority to regulate firearms, would grant local government authority to regulate firearms and where they can be present. This would change the current pre-emption of firearms regulation. Opponents say that the bill would create a patchwork of regulations and gun owners would need to research restrictions in

multiple jurisdictions. On the Pro side, different cities and towns have differing conditions regarding use of firearms. **HB 1178** had a public hearing in the House Civil Rights and Judiciary Committee on January 27 and executive session on February 3, but no action was taken. **SB 5446** did not get a public hearing and has died.

HB 1195 Prohibiting the open carry of certain weapons in public parks and public hospitals

This bill had a public hearing on January 18. No action was taken in executive session on January 27.

SB 5265 Establishing firearms-related safety measures to increase public safety, the companion bill to HB 1240, above, would essentially ban the manufacture, distribution, and purchase of assault-type weapons which have been used in most mass shootings. The weapons specified in the bill are variations of military weapons designed to kill as many persons as possible in the shortest time period. Washington would become the tenth state to ban assault weapons if the bill passes. This is the sixth year a ban on assault weapons has been proposed by the Attorney General. **SB 5265** never had a public hearing in the Law & Justice Committee and died.

How You Can Be Involved

- Respond to Action Alerts in the legislative newsletter. These will primarily appear in the section of the newsletter related to Gun Safety
- Contacting Cynthia Stewart, cstewart@lwvwa.org.
