

WATER DISTRICT FACT SHEET

What does a Water District do?

Deliver safe & reliable drinking water

Conserve & maintain water resources

Water districts are governed by 3 or 5 elected commissioners who serve 6-year nonpartisan terms.

What does the Board of Commissioners do?

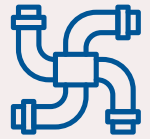

Determine current & future customer needs

Select a water supply for current and future needs

Plan for collecting water, storing water, piping to move water around the district

YOUR VOTE can have an impact on services and costs, so carefully review candidates for Water District Commissioner

How are Water Districts Funded?

Customer fees

Taxes

Bonds

There are 6 water districts and one water/sewer district in Kittitas County. They issue an annual water quality report and notify customers in the event of water regulation violation or risk to public health. Water districts are important to every resident of Kittitas County!
